

PRINTING INSTRUCTIONS

Accessing Your Digital File

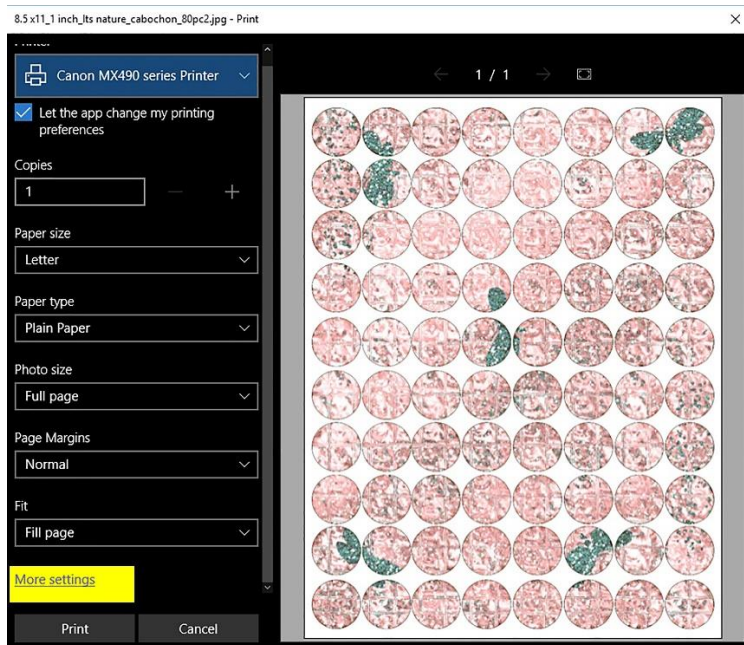

Once you download your multimediacraftsdigi.com Freebie file it is ready for you to begin your creations. Whether it's using it with another digital craft or for printing out, here are some helpful printing tips.

Printing Your Digital File

1. Most of your digital files will come compressed and will require some type of extracting software to unzip them. This step must be done first. If your device does not have any extracting applications installed on it, you can google some free unzipping programs to use. Here is a link for a free download: https://www.winzip.com/landing/download-winzip.html?gclid=CjwKCAiAgrfhBRA3EiwAnfF4tpb1x99ra5LiSjoiXQFlr-QFnUX_qkXgFDE-KxAcbu631EjTQEHmJxoCxRMQAvD_BwE
2. After the files have been extracted, you can simply choose the one(s) you want and click "Print". Once the Printer Dialogue box is open, choose to **"let the app change my printing preferences"** option if it is available. Also, under the **"Fit"** option, choose the **"Fill Page"** drop down menu option. If you use the "shrink to Fit" option, parts of your image may get cut out.

3. Go to “More Settings”, scroll down to the “Output Options”, and make sure that the “Borderless Printing” dropdown menu is set to “ON”. Click “OK” and you are all set. Your image will print over the entire piece of paper. However, depending on your printer’s ink quality, setting your “Borderless Printing” option to “OFF” may be a better option if the image comes out clearer that way. Try printing with both borderless on and off and compare the difference to suit your needs.
